

Envision Roller Shades Features

Fabrics

EcoGreen™

- PVC-free, fully recyclable fabrics may contribute toward LEED® certification.
- Good for the world and for you.
- Includes Strata, Terrene and Aurora fabric collections.

Head Rail Options

- Standard Roller Head Rail is available with standard or reverse roll.
- Upgrade to Cassette, UltraSleek™ or motorization options for coordinated looks and easy operation.

Head Rail.

- Steel bead chain features fabric coordinated clutches in white or black.

Coordinating Colors

- White and black clutches and white, black and steel bead chains are available on the Standard Roller

Fabric Wrapped Bottom Rail

- All Envision Shades feature the acclaimed fabric wrapped bottom rail for a tailored look.
- Bottom rails are white and black and are color matched to the bead chains and clutches on Envision Shades with Standard Head Rail

Envision Head Rail Options

Standard Roller

Mounting Dimensions

- Minimum depth for flush inside mount including installation brackets: 3"
- Minimum depth required for shallow mounting: 1-1/8"
- Minimum depth for side mount: 1-1/2"
- Maximum shade width for side mount: 48"
- Minimum surface area required for outside mount: 2"

Shade Dimensions

- Minimum Width: 12"
- Maximum Width: 92"
- Minimum Length: 12"
- Maximum Length: 120"

Finished Dimensions

Inside Mount

- Bracket to bracket measurement: ordered width minus $\frac{3}{16}$ "
- End to end roller width: ordered width minus $1\frac{9}{16}$ "
- Fabric width: ordered width minus $1\frac{3}{4}$ "
- Bottom rail width: ordered width minus $1\frac{3}{4}$ "

Outside Mount

- Bracket to bracket measurement: ordered width plus $\frac{3}{16}$ "
- End to end roller width: ordered width minus $1\frac{3}{16}$ "
- Fabric width: ordered width minus $1\frac{3}{8}$ "
- Bottom rail width: ordered width minus $1\frac{3}{8}$ "

Shade Features

- Roll style: Standard or reverse
- Cord options: Bead chain only
- Cord color: White or black
- Clutch color: White or black (factory-matched with fabrics)
- Bottom rail color: White or black (beneath fabric wrap - matched with clutch)

Envision Head Rail Options

UltraSleek™

Mounting Dimensions

- Minimum depth for flush inside mount including installation brackets: 2-3/4"
- Minimum depth required for shallow mounting: 1-1/8"
- Minimum depth for side mount: 1-1/8"
- Maximum shade width for side mount: 48"
- Minimum surface area required for mounting: 1"

Shade Dimensions

- Minimum Width: 12"
- Maximum Width: 84"
- Minimum Length: 12"
- Maximum Length: 84"

Finished Dimensions

Inside Mount

- Head rail measurement: ordered width minus $\frac{3}{16}$ " (measurement includes end caps)
- Fabric measurement: ordered width minus $1 \frac{1}{8}$ "

Side (End) Mount

- Head rail measurement: ordered width minus $\frac{11}{16}$ " (measurement includes end caps)
- Fabric measurement: ordered width minus $1 \frac{5}{8}$ "

Outside Mount

- Head rail measurement: ordered width plus $\frac{3}{16}$ " (measurement includes end caps)
- Fabric measurement: ordered width minus $\frac{3}{4}$ "

Shade Features

- Roll style: Standard only
- Cord type: Bead chain only
- Hardware color: White only with matching fabric strip
- Cord color: White only
- Bottom rail color: White only (beneath fabric wrap)

Envision Head Rail Options

Cassette

Mounting Dimensions:

- Minimum depth for flush inside mount including installation brackets: $3\frac{3}{8}$ "
- Minimum depth required for shallow mounting: $\frac{3}{4}$ "
- Minimum depth for side mount: $1\frac{1}{4}$ "
- Maximum shade width for side mount: 48"
- Minimum surface area required for mounting: $\frac{3}{4}$ "

Shade Dimensions

- Minimum Width: 12"
- Maximum Width: 90"
- Minimum Length: 12"
- Maximum Length: 120"

Finished Dimensions

Inside Mount

- Head rail measurement: ordered width minus $\frac{3}{16}$ "
- Fabric measurement: ordered width minus $1\frac{1}{8}$ "

Side (End) Mount

- Head rail measurement: ordered width minus $1\frac{1}{16}$ " (measurement includes end caps)
- Fabric measurement: ordered width minus $1\frac{5}{8}$ "

Outside Mount

- Head rail measurement: ordered width plus $\frac{3}{16}$ " (measurement includes end caps)
- Fabric measurement: ordered width minus $\frac{3}{4}$ "

Shade Features

- Roll style: Standard only
- Cord type: Braided polyester (standard) or bead chain (optional) White only
- Hardware color: with matching fabric strip
- Cord color: White only
- Bottom rail color: White only (beneath fabric wrap)

General Information

Envision Roller Shade Bottom Rail

All Envision Roller Shades feature a unique bottom rail design. The shade fabric is wrapped around an elliptical grooved rail. Two plastic end caps secure the fabric in place. The result is an attractive look which enhances the overall appearance of the shade.

Bottom rails paired with the UltraSleek and Cassette Head Rails are white (beneath the fabric wrap) and have white end caps. Envision Shades built with Standard Roller Head Rails feature bottom rails and end caps which are either white or black to match the clutches and/or bead cords.

Envision Roller Shade Cord Information

Envision Roller Shades are available with a choice of cord loops: bead chain and braided polyester cord.

- A bead chain is the only option available with the Standard Roller. Select white, black or steel bead chain.
- A bead chain is the only option available with the UltraSleek Head Rail. It is available in white only.
- A braided polyester cord loop comes standard with the Cassette Head Rail. The bead chain is available as a no charge option. Both cords are available in white only with Cassette Head Rail.
- The cord loops will measure the length indicated below from 2' to 8' at 1' intervals unless otherwise specified.

<u>Shade Length</u>	<u>Standard Loop</u>
12" - 36"	2' (24")
>36" - 48"	3' (36")
>48" - 72"	4' (48")
>72" - 96"	5' (60")
>96" - 1 20"	6' (72")

- The continuous cord loop can be ordered in custom lengths in 1' increments only. Maximum cord length is 8'.

Reverse Roll on Envision Roller Shades

A reverse roll option is available at no extra charge with all Envision Roller Shade fabrics on the Standard Roller only. The reverse roll allows the fabric to roll off the front of the roller instead of the back (the traditional style). The reverse roll conceals the roller for a contemporary, tailored appearance.

Measuring Instructions for Roller Shades

- Precise width and length measurements are critical. Fabric width cannot be altered after the shade is fabricated.
- Please use a metal tape measure for accuracy from home to factory.
- The head rail must be installed perfectly level and installed evenly to ensure smooth operation. On an inside mount, it is recommended that you check to see that the mounting surface is level and consistent. If your soffit needs to be leveled, this should be done before measuring.

Envision Roller Shades are leveled and weighted in the factory. When installed level, the fabric will not skew when raised. If the head rail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the installation instructions carefully to ensure balanced operation. Inside Mount (IB)

Measure across the width of your window opening in three different places - top, middle and bottom. Measurements should be taken within the window jamb. Provide the smallest of the three measurements to Comfortex. Be exact. Comfortex will make the necessary deductions to fit the window opening.

Measure the length of the window opening from the underside of the soffit to the surface of the window sill in two places - use the smallest of these two measurements.

Outside Mount (OB)

Measure the exact width and length of the area to be covered. On the width, allow at least 1 ½" of an overlap on each side. An overlap of 3" on each side is recommended.

Be sure to take into consideration any obstructions such as window trim, molding, locks and window cranks.

Side Mount

Side mount is not available for the Standard Roller.

Envision Roller Shades with the Cassette Roller may be side mounted using "L" brackets. For side mounts, follow the instructions for inside mounts. An additional 2" will be taken off the standard inside mount deduction to allow room for the "L" brackets.

The maximum shade width utilizing the side mount option is 48".

General Information

Envision Roller Shades Warranty Information

Comfortex warrants that its window treatments will be free from defects in materials and workmanship for as long as the original residential purchaser owns the product, provided that the product was installed properly and in accordance with the installation instructions. The limited lifetime warranty is extended to the original residential purchaser only, in the original window for which it was installed.

The warranty does not include any conditions or damages resulting from accidents, alterations, misuse, misapplication, improper handling, installation, repairs, operation or cleaning, environmental or acts of nature. Normal wear and tear is not covered.

All moving parts, such as cords, may eventually wear out. Comfortex considers this to be normal wear and tear and these parts will carry a three year limited warranty. Performance of fabric is dependent on its fiber content and weave. Inherent characteristics of fabric are not covered under warranty. These include, but are not limited to, reactions to heat and humidity fluctuations and fraying.

This limited warranty does not cover transportation costs to and from the retailer, costs of removal, re-measure, or reinstallation of product, or any incidental or consequential damages.

If a Comfortex product is found to be defective in materials or workmanship, we will, at our discretion, repair, replace or refund the cost of a product which fails to conform to this limited warranty. Colors vary from lot to lot and may not exactly match sample swatch, sample book, or previous purchases. Discontinued components or color selections will be replaced with the closest equivalent current product. This shall be your sole remedy under this limited warranty.

To obtain service, contact the dealer from whom you purchased the product.

This warranty is exclusive and in lieu of all other obligations, liabilities or warranties. In no event shall Comfortex or its licensed fabricators or distributors be liable for incidental or consequential damages, or for any other damage, loss or expense, cost or fee associated with such damage. In some states, exclusions for incidental or consequential damages are not allowable.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Policy is subject to change without notice.

This limited warranty is exclusive of commercial use. Contact Comfortex Technical Service for more information. No agent, representative, dealer or unauthorized employee has the authority to increase or alter the obligation of this warranty.

This limited warranty supersedes any previous versions.

Motorized Shades Warranty

Somfy warrants their motors and motor control systems to be free from defects in materials and workmanship under normal and proper use for a period of five years starting from the date stamped on the motor. Mechanical, electrical and electronic accessories are warranted for one year from the date of invoice.

Cleaning and Care

Occasional light vacuuming with a soft bristle attachment or gentle feather dusting is all that is required to keep Envision Roller Shades looking fresh and neat.

SilverScreen™ fabrics are easy to maintain. Dust can be removed with a soft feather duster or by vacuuming with a soft brush at the lowest position. When intensive cleaning is required, the colored (room) side can be cleaned with a wet cloth. NEVER use an alcohol or ammonia based cleaner (such as Windex®) on SilverScreen fabrics or allow those cleaners to come into contact with the silver side of the shade.

Phifer SheerWeave® fabrics are easy to maintain and only require occasional vacuuming with a soft brush attachment or washing with mild soap. Soak a sponge or damp cloth with the soapy solution and gently wipe or blot the stain from the fabric. To dry, allow the shade to air dry completely before raising.

Child Safety

Be aware that it is possible for children to become entangled in window covering cords. To reduce the risk of accidents, all cords must be kept out of the reach of children.

Cord tensioners are an effective way to implement this essential precaution. Please use them. To mount the cord tensioner at a safe height, take into account furniture or other objects upon which a child may climb.

Cord tensioners keep the continuous cord loops taut to prevent children and pets from becoming entangled and injuring themselves. Cord tensioners must be used with all Envision Roller Shades to comply with the Consumer Product Safety Commission (CPSC) Child Safety Guidelines.
